| Illinois Learning Standards for Mathematics Correlated to Moving with Math Math-by-Topic Level B Grade 4 |  |  |  |
|  |  | Teacher Guide \& Student Book | Skill Builders |
| 4.0A | OPERATIONS AND ALGEBRAIC THINKING |  |  |
|  | Use the four operations with whole numbers to solve problems. |  |  |
| 1. | Interpret a multiplication equation as a comparison, e.g., interpret $35=5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5 . Represent verbal statements of multiplicative comparisons as multiplication equations. |  |  |
| 2. | Multiply or divide to solve word problems involving multiplicative comparisons, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison. |  |  |
| 3. | Solve multi-step word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. |  | 49-4, 49-5, 49-6 |
|  | Gain familiarity with factors and multiples. |  |  |
| 4. | Find all factor pairs for a whole number in the range 1-100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1-100 is prime or composite. |  |  |
|  | Generate and analyze patterns. |  |  |
| 5. | Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way. | BI: 14-16 |  |
| 4.NBT | NUMBER AND OPERATIONS IN BASE TEN |  |  |
|  | Generalize place value understanding for multi-digit whole numbers. |  |  |

|  |  | Teacher Guide \& Student Book | Skill Builders |
| :---: | :---: | :---: | :---: |
| 1. | Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that $700 \div 70=10$ by applying concepts of place value and division. | BI: 6, 18 | 6-1, 6-6 |
| 2. | Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons. | BI: 4-8, 11, 20, 21 | 2-1, 2-3, 4-1, 4-2 |
| 3. | Use place value understanding to round multi-digit whole numbers to any place. | BI: 34-38 | 8-1 |
|  | Use place value understanding and properties of operations to perform multi-digit arithmetic. |  |  |
| 4. | Fluently add and subtract multi-digit whole numbers using the standard algorithm. | $\begin{aligned} & \text { BI: 45-47, 57, 59- } \\ & 62 \end{aligned}$ | 10-2, 10-3 |
| 5. | Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | $\begin{aligned} & \text { BII: } 25-27,30-32, \\ & 35-39 \end{aligned}$ | 21-1, 22-1, 22-2 |
| 6. | Find whole-number quotients and remainders with up to fourdigit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | BII: 62-69, 71-75 | 27-2, 27-3 |
| 4.NF | NUMBER AND OPERATIONS - FRACTIONS |  |  |
|  | Extend understanding of fraction equivalence and ordering. |  |  |
| 1. | Explain why a fraction $a / b$ is equivalent to a fraction $(n \times a) /(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. |  |  |
| 2. | Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1 / 2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>,=$, or <, and justify the conclusions, e.g., by using a visual fraction model. | BIII: 16, 17 | 32-2, 32-3 |
|  | Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers. |  |  |
| 3. | Understand a fraction $a / b$ with $a>1$ as a sum of fractions $1 / b$. | BIII: 19, 20 |  |
| a. | Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. | BIII: 19, 21 | 33-1, 33-3 |

| :---: | :--- | :--- | :--- |
| 1. | Draw points, lines, line segments, rays, angles (right, acute, <br> obtuse), and perpendicular and parallel lines. Identify these in two <br> dimensional figures. | BII: 32, 34, 36,37 | $35-1,35-2,37-1$ |
| 2. | Classify two-dimensional figures based on the presence or <br> absence of parallel or perpendicular lines, or the presence or <br> absence of angles of a specified size. Recognize right triangles as <br> a category, and identify right triangles. | 40-2 |  |
| 3. | Recognize a line of symmetry for a two-dimensional figure as a <br> line across the figure such that the figure can be folded along the <br> line into matching parts. Identify line-symmetric figures and draw <br> lines of symmetry. | BIII: 38 | $38-1,28-2$ |
|  | BI: Numeration, Addition \& Subtraction |  |  |
|  | BII: Multiplication \& Division |  |  |
|  | BIII: Fractions, Geometry \& Measurement |  |  | Summary: 19/37 = 51\% correlation
