K.CC	COUNTING AND CARDINALITY		
Α.	Know number names and the count sequence.		
1.	Count to 100 by ones and by tens.	174	
2.	Count forward beginning from a given number within	75	
	the known sequence (instead of having to begin at 1).	10 10 51 50 50	
3.	Write numbers from 0 to 20. Represent a number of	43-49, 51-56, 58,	3-2, 6-1, 6-3, 6-
	objects with a written numeral 0-20 (with 0 representing a count of no objects).	64-74, 83-87, 164-168, 170	4, 6-5, 6-6, 10-1, 30-2
В.	Count to tell the number of objects.		
4.	Understand the relationship between numbers and quantities; connect counting to cardinality.	43-49, 51-58, 65- 74, 83-87, 164- 168	5-1 to 5-6, 6-1
a.	When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.	42, 43, 45, 47, 51, 53, 65, 67, 69, 71, 73, 83, 85	5-3, 5-4, 5-5, 5-6
b.	Understand that the last number name tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.	42, 43, 45, 47, 51, 53, 57, 65, 67, 69, 71, 73, 83, 85	5-1, 5-2, 7-1, 10- 1
C.	Understand that each successive number name refers to a quantity that is one larger.	58, 65, 67, 69, 71, 73, 75, 83,	
5.	Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scatted configuration; given a number from 1-20, count out that many objects.	49, 51, 53, 57, 65, 67, 69, 71, 73, 83, 85, 86, 164-168, 170	5-1, 6-1, 10-1, 30 2
C.	Compare numbers.		
6.	Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.	18, 20, 42, 143, 144	2-1, 3-1, 3-2, 8- 1, 8-2, 8-3
7.	Compare two numbers between 1 and 10 presented as written numerals.	87	3-2
K.0A	OPERATIONS AND ALGEBRAIC THINKING		
A.	Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.		

		Lesson Plan	Skill Builder
		Page (located in	Page (located in
		Teacher	Teacher
		Resource	Resource
		Manual) &	Manual)
		Student Activity	
1.	Represent addition and subtraction with objects,	120-129, 134-	26-1, 26-2, 27-1,
	fingers, mental images, drawings, sounds (e.g., claps),	142	27-2, 29-1
	acting out situations, verbal explanations, expressions,		
	or equations.		
2.	Solve addition and subtraction word problems, and add	119-129, 133-	26-1, 26-2, 26-5,
	and subtract within 10, e.g., by using objects or	142, 144, 145,	27-1, 27-2, 28-1,
	drawings to represent the problem.	147	29-1
3.	Decompose numbers less than or equal to 10 into pairs	65, 67, 69, 71,	
	in more than one way, e.g, by using objects or	73, 128, 142	
	drawings, and record each decomposition by a drawing		
	or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).		
4.	For any number from 1 to 9, find the number that		26-5
	makes 10 when added to the given number, e.g., by		
	using objects or drawings, and record the answer with a		
	drawing or equation.		
5.	Fluently add and subtract within 5.	122-129, 136-	26-1 to 26-5, 27-
		142, 145	1 to 27-4
L/ ND	NUMBER AND OPERATIONS IN DASS TEN		
K.NB T	NUMBER AND OPERATIONS IN BASE TEN		
A.	Work with numbers 11-19 to gain foundations for		
	place value.		
1.	Compose and decompose numbers from 11 to 19 into	83, 165-168	
	ten ones and some further ones, e.g., by using objects		
	or drawings, and record each composition or		
	decomposition by a drawing or equation (e.g., 18 = 10 +		
	8); understand that these numbers are composed of		
	ten ones and one, two, three, four, five, six, seven,		
	eight or nine ones		
14.145	ME AGUIDEMENT AND DATA		
K.MD	MEASUREMENT AND DATA		
A.	Describe and compare measurable attributes.	20 22 105 115	20 1 20 2 21 1
1.	Describe measurable attributes of objects, such as length or weight. Describe several measurable	30-32, 105-115	20-1, 20-2, 21-1,
	attributes of a single object.		21-2
2.	Directly compare two objects with a measurable	30-32, 106, 107,	14-1, 14-2, 21-1,
	attribute in common, to see which object has "more	113, 115	21-2
	of"/"less of" the attribute, and describe the difference.	,	-·-
	For example, directly compare the heights of two		
	children and describe one child as taller/shorter.		
B.	Classify objects and count the number of objects in		
	each category.	44 40 40 45	40.4.40.0
3.	Classify objects into given categories; count the	11, 12, 13, 15,	13-1, 13-2
	numbers of objects in each category and sort the	61	
	categories by count. (Limit category counts to be less		
	than or equal to 10.)		
K.G	GEOMETRY		
A.	Identify and describe shapes.		
	indiana and a second a second and a second a		

		Lesson Plan	Skill Builder
		Page (located in	Page (located in
		Teacher	Teacher
		Resource	Resource
		Manual) &	Manual)
		Student Activity	
1.	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as <i>above</i> , <i>below</i> , <i>beside</i> , <i>in front of. behind</i> . and <i>next to</i> .	25, 27, 28, 29, 33, 39	16-1, 16-2
2.	Correctly name shapes regardless of their orientations or overall size.	26-29, 33, 35, 36	15-1, 16-1, 16-2
3.	Identify shapes as two-dimensional (lying in a plane, "flat") or three-dimensional ("solid").	27-29, 34	
В.	Analyze, compare, create, and compose shapes.		
4.	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having	27-29, 33, 34, 36, 37, 39	
5.	Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.	25, 27, 33, 38	15-2
6.	Compose simple shapes to form larger shapes. For example, "Can you join these two triangles with full sides touching to make a rectangle?"	117	4-3, 22-4, 29-2 to 29-6
