## Georgia's K-12 Mathematics Standards Correlated to *Moving with Algebra Grade 7*

		Part A Student Book Skill Builders (SB)	Part B Student Book Skill Builders (SB)	Part C Student Book Skill Builders (SB)
	<b>NUMERICAL REASONING</b> – integers, percentages, fractions, decimal numbers			
<b>7.NR.1:</b>	<b>Solve relevant, mathematical problems, including multi-step problems, involving the four operations with rational numbers and quantities in any form (integers, percentages, fractions, and decimal numbers).</b>			
<b>7.NR.1.1</b>	Show that a number and its opposite have a sum of 0 (are additive inverses). Describe situations in which opposite quantities combine to make 0.	65-67 <b>SB:</b> 55	243	
<b>7.NR.1.2</b>	Show and explain $p + q$ as the number located a distance $ q $ from $p$ , in the positive or negative direction, depending on whether $q$ is positive or negative. Interpret sums of rational numbers by describing applicable situations.	68-71, 124 <b>SB:</b> 56, 57	244 <b>SB:</b> 202	
<b>7.NR.1.3</b>	Represent addition and subtraction with rational numbers on a horizontal or a vertical number line diagram to solve authentic problems.	71, 78, 105, 106	<b>SB:</b> 204	
<b>7.NR.1.4</b>	Show and explain subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$ . Show that the distance between two rational numbers on the number line is the absolute value of their difference and apply this principle in contextual situations.	73, 125 <b>SB:</b> 58, 142	245 <b>SB:</b> 203	
<b>7.NR.1.5</b>	Apply properties of operations, including part-whole reasoning, as strategies to add and subtract rational numbers.	94-96, 98-102 <b>SB:</b> 74-83		
<b>7.NR.1.6</b>	Make sense of multiplication of rational numbers using realistic applications.	74, 75, 107-112, 126, 147-151. <b>SB:</b> 59, 89-94, 120-124	246	

		<b>Part A Student Book Skill Builders (SB)</b>	<b>Part B Student Book Skill Builders (SB)</b>	<b>Part C Student Book Skill Builders (SB)</b>
<b>7.NR.1.7</b>	Show and explain that integers can be divided, assuming the divisor is not zero, and every quotient of integers is a rational number.	76, 77, 113-115, 126 <b>SB:</b> 60, 96-98, 143	247 <b>SB:</b> 206	
<b>7.NR.1.8</b>	Represent the multiplication and division of integers using a variety of strategies and interpret products and quotients of rational numbers by describing them based on the relevant situation.	108-110, 112, 115, 153-156 <b>SB:</b> 91-94, 98, 125	246, 247 <b>SB:</b> 205, 206	
<b>7.NR.1.9</b>	Apply properties of operations as strategies to solve multiplication and division problems involving rational numbers represented in an applicable scenario.	107		
<b>7.NR.1.10</b>	Convert rational numbers between forms to include fractions, decimal numbers and percentages, using understanding of the part divided by the whole. Know that the decimal form of a rational number terminates in 0s or eventually repeats.	129-131, 134, 136, 140, 141, 161-167 <b>SB:</b> 105-108, 110, 111, 115, 116, 130-132, 145		
<b>7.NR.1.11 S</b>	Solve multi-step, contextual problems involving rational numbers, converting between forms as appropriate, and assessing the reasonableness of answers using mental computation and estimation strategies.	105, 106, 119, 142, 159, 160, 173-178 <b>SB:</b> 87-89, 129, 136-138		
	<b>PATTERNING &amp; ALGEBRAIC REASONING</b> – linear expressions with rational coefficients, complex unit rates, proportional relationships			
<b>7.PAR.2:</b>	<b>Use properties of operations, generate equivalent expressions and interpret the expressions to explain relevant situations.</b>			
<b>7.PAR.2.1</b>	Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.			392, 393 <b>SB:</b> 309-311
<b>7.PAR.2.2</b>	Rewrite an expression in different forms from a contextual problem to clarify the problem and show how the quantities in it are related.			
<b>7.PAR.3:</b>	<b>Represent authentic situations using equations and inequalities with variables; solve equations and inequalities symbolically, using the properties of equality.</b>			

		<b>Part A Student Book Skill Builders (SB)</b>	<b>Part B Student Book Skill Builders (SB)</b>	<b>Part C Student Book Skill Builders (SB)</b>
<b>7.PAR.3.1</b>	Construct algebraic equations to solve practical problems leading to equations of the form $px + q = r$ and $p(x + q) = r$ , where $p$ , $q$ , and $r$ are specific rational numbers. Interpret the solution based on the situation.			344, 345, 347 <b>SB:</b> 267, 271, 301
<b>7.PAR.3.2</b>	Construct algebraic inequalities to solve problems, leading to inequalities of the form $px + q > r$ , $px + q < r$ , $px + q \leq r$ , or $px + q \geq r$ , where $p$ , $q$ , and $r$ are specific rational numbers. Graph and interpret the solution based on the realistic situation that the inequalities represent.			375, 376 <b>SB:</b> 290-293
<b>7.PAR.4:</b>	<b>Recognize proportional relationships in relevant, mathematical problems; represent, solve, and explain these relationships with tables, graphs, and equations.</b>			
<b>7.PAR.4.1</b>	Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units presented in realistic problems.		224, 225 <b>SB:</b> 189	
<b>7.PAR.4.2</b>	Determine the unit rate (constant of proportionality) in tables, graphs $(1, r)$ , equations, diagrams, and verbal descriptions of proportional relationships to solve realistic problems.			362-364 <b>SB:</b> 284, 285, 297-300
<b>7.PAR.4.3</b>	Determine whether two quantities presented in authentic problems are in a proportional relationship			362
<b>7.PAR.4.4</b>	Identify, represent, and use proportional relationships.			362-364 <b>SB:</b> 298-300
<b>7.PAR.4.5</b>	Use context to explain what a point $(x, y)$ on the graph of a proportional relationship means in terms of the situation, with special attention to the points $(0, 0)$ and $(1, r)$ where $r$ is the unit rate.			363, 364 <b>SB:</b> 285, 297-300
<b>7.PAR.4.6</b>	Solve everyday problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.		226, 227 <b>SB:</b> 191, 192	
<b>7.PAR.4.7</b>	Use similar triangles to explain why the slope, $m$ , is the same between any two distinct points on a nonvertical line in the coordinate plane.			350

		<b>Part A Student Book Skill Builders (SB)</b>	<b>Part B Student Book Skill Builders (SB)</b>	<b>Part C Student Book Skill Builders (SB)</b>
<b>7.PAR.4.8</b>	Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways.			363 <b>SB:</b> 285, 297-300
<b>7.PAR.4.9</b>	Use proportional relationships to solve multi-step ratio and percent problems presented in applicable situations.			
<b>7.PAR.4.1 0</b>	Predict characteristics of a population by examining the characteristics of a representative sample. Recognize the potential limitations and scope of the sample to the population.			
<b>7.PAR.4.1 1</b>	Analyze sampling methods and conclude that random sampling produces and supports valid inferences.			
<b>7.PAR.4.1 2</b>	Use data from repeated random samples to evaluate how much a sample mean is expected to vary from a population mean. Simulate multiple samples of the same size.			
	<b>GEOMETRIC &amp; SPATIAL REASONING –</b> vertical, adjacent, complementary, and supplementary angles, circumference and area of circles, area and surface area, volume of cubes, right prisms, and cylinders			
<b>7.GSR.5:</b>	<b>Solve practical problems involving angle measurement, circles, area of circles, surface area of prisms and cylinders, and volume of cylinders and prisms composed of cubes and right prisms.</b>			
<b>7.GSR.5.1</b>	Measure angles in whole nonstandard units.			
<b>7.GSR.5.2</b>	Measure angles in whole number degrees using a protractor.		186	
<b>7.GSR.5.3</b>	Use facts about supplementary, complementary, vertical, and adjacent angles in a multi-step problem to write and solve equations for an unknown angle in a figure.		194, 195 <b>SB:</b> 163	
<b>7.GSR.5.4</b>	Explore and describe the relationship between pi, radius, diameter, circumference, and area of a circle to derive the formulas for the circumference and area of a circle.		183, 209 <b>SB:</b> 149, 177	

		<b>Part A Student Book Skill Builders (SB)</b>	<b>Part B Student Book Skill Builders (SB)</b>	<b>Part C Student Book Skill Builders (SB)</b>
<b>7.GSR.5.5</b>	Given the formula for the area and circumference of a circle, solve problems that exist in everyday life.			
<b>7.GSR.5.6</b>	Solve realistic problems involving surface area of right prisms and cylinders.			
<b>7.GSR.5.7</b>	Describe the two-dimensional figures (cross sections) that result from slicing three-dimensional figures, as in the plane sections of right rectangular prisms, right rectangular pyramids, cones, cylinders, and spheres.		214	
<b>7.GSR.5.8</b>	Explore volume as a measurable attribute of cylinders and right prisms. Find the volume of these geometric figures using concrete problems.		212-214 <b>SB:</b> 180-182, 256, 257	
	<b>PROBABILITY REASONING</b> – likelihood, theoretical and experimental probability			
<b>7.PR.6:</b>	<b>Using mathematical reasoning, investigate chance processes and develop, evaluate, and use probability models to find probabilities of simple events presented in authentic situations.</b>			
<b>7.PR.6.1</b>	Represent the probability of a chance event as a number between 0 and 1 that expresses the likelihood of the event occurring. Describe that a probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.			
<b>7.PR.6.2</b>	Approximate the probability of a chance event by collecting data on an event and observing its long-run relative frequency will approach the theoretical probability.			
<b>7.PR.6.3</b>	Develop a probability model and use it to find probabilities of simple events. Compare experimental and theoretical probabilities of events. If the probabilities are not close, explain possible sources of the discrepancy.			
<b>7.PR.6.4</b>	Develop a uniform probability model by assigning equal probability to all outcomes and use the model to determine probabilities of events.			

		<b>Part A Student Book Skill Builders (SB)</b>	<b>Part B Student Book Skill Builders (SB)</b>	<b>Part C Student Book Skill Builders (SB)</b>
<b>7.PR.6.5</b>	Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process.			
<b>7.PR.6.6</b>	Use appropriate graphical displays and numerical summaries from data distributions with categorical or quantitative (numerical) variables as probability models to draw informal inferences about two samples or populations.
